

Publishing books with Cambridge University Press

CAMBRIDGE
UNIVERSITY PRESS

What books are we interested in?

- World class research that makes an “original and significant contribution to the literature”
- Surveys and reviews of major topics suitable for advanced undergraduate and graduate students
- Reference Works (Handbooks)
- Practitioner Guides (only some subjects)
- We **don't** publish memoirs, autobiographies, fiction, poetry, cookbooks, travel books, etc. – meant for consumers

What books are we interested in?

- 30,000 eBooks available on Cambridge Core
- Highest standard of **Quality Control from review to production**
- 500+ **awards/prizes** since 2014
- 1,500 books published each year with 400 journals

University Presses Around the World

Manchester University Press

THE UNIVERSITY OF CHICAGO PRESS

Submitting a book proposal

- Do your **homework!**
- Try and **find the name of the relevant editors** – most publishers' websites list editorial contacts
- **Personal contact** always best!
- Write a **personal email** to editor to give basic details of the book project you would like to discuss. Do not assume they are experts!
- Attach a **book prospectus**. Do not **send full manuscript** unless requested

What to include in a book proposal

- Use a **clear, descriptive title** – don't try to make a “clever” title
- A **short** summary of the aims and scope of the book and why you think it makes an **original** and **distinctive** contribution
- A detailed **table of contents** with 200-500 word **summaries** of each chapter and a list of the literature you intend to cite

What to include in a book proposal

- Brief description of your **target readership** – hint: much better to be focused and precise than to say that everybody will want to read it!
- Brief analysis of some of the most closely related books to yours. **How will your book add to the literature?**
- Short author biography (incl. relevant publications/expertise)
- A few sample chapters or draft manuscript (submit only when asked)
- Generally OK to submit to multiple publishers but inform all parties first

Peer review: Journals vs Books

- Typically narrower terms of reference for journal review – books bigger, more complex, often interdisciplinary ... and market matters
- We take peer review very seriously and ask a lot from our referees
- Not an exact science in either case

Book Review Process

- **DESK REVIEW** – in house editor will assess whether suitable for list.
 - If yes, then will proceed to peer review.
 - Acceptance rate at this stage varies a lot according to discipline
- **PEER REVIEW** Depending on policy of publisher, editor may ask to see full manuscript to send for peer review or may be happy to send prospectus with sample chapters

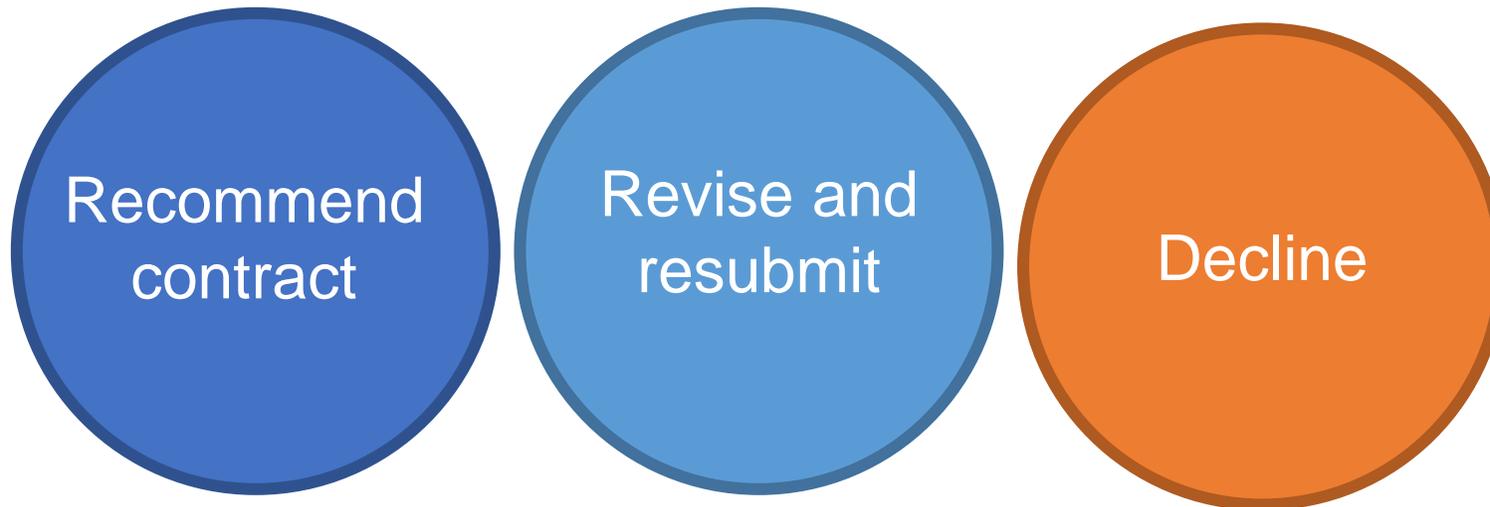

Book Review Process

- Single blind, typically 2-3 reviews per project
- **Outcome:** decline, revise & resubmit, recommend contract
- Hard work – CUP book editors commission
c. 4,000 reports each year
- Hard work – we often ask referees to read full manuscripts
or comment on interdisciplinary work.
- Typically paid with book allowance, but also cash
- Tricky decisions – referees seldom agree with each other

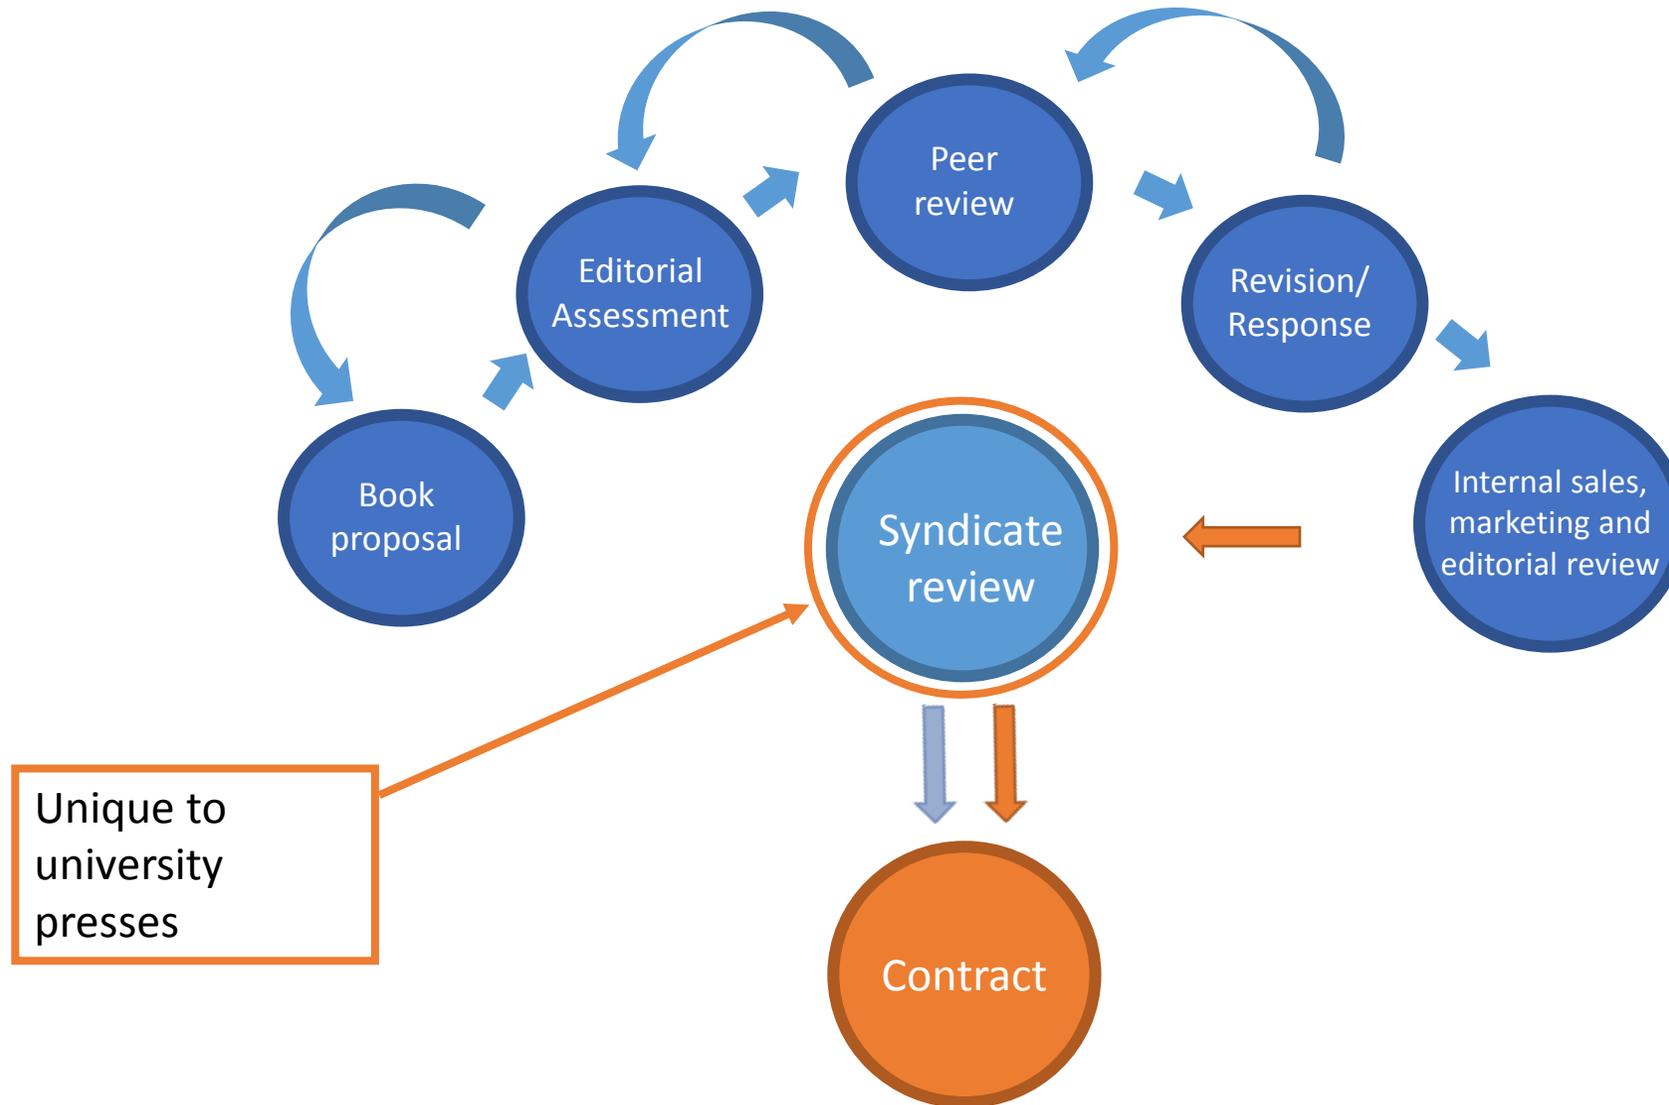

Book Review Process/Decision

- Typically external ‘single-blind’ review by international experts
- You can request who should not review if you have valid reasons
- Commissioning editor will review all referee reports to decide an outcome for the Syndicate’s approval:

Takes c. 8-16 weeks to receive all the reports.

The assessment process for books

The Press Syndicate of Cambridge

- Governing body of Cambridge University Press
- 18 members called 'Syndics' (senior professors from various faculties/depts of Cambridge)
- All new publications (books and journals) must be approved by the Academic Publishing Committee of the Syndicate
- Applies to all authors whether Nobel prize winners and postdocs!

The Syndicate

Introducing Cambridge Elements

combining the best of journals and books

CAMBRIDGE
UNIVERSITY PRESS

Cambridge Elements

Cambridge Elements

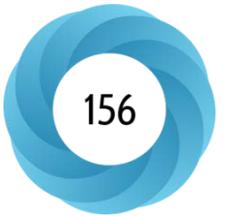

- Combines the best in journals and books publishing.
- 25k-30k words; updates/editions available to authors
- Soft launch in 2018
- organised in series edited by top scholars (like a journal) and rigorously peer-reviewed
- Published online as full-text HTML/PDF and paperback
- Cambridge Elements Core Landing page:
<https://www.cambridge.org/core/what-we-publish/elements>

Cambridge Elements

- Over 80 series commissioned (not all series have started to publish content)
- Mostly in HSS (but STM working hard to commission more)
- 90 individual Elements published so far
- We aim to publish c. 150-200 Elements each year
- Purchase as a paperback (print-on-demand):
US\$18/£15

Cambridge Elements

- Highest Altmetric score:
 - Cairney/Heikkila/Wood - *Making Policy in a Complex World*
- Highest downloads/views:
 - Tan - *Singapore* (12,900)
 - Craig - *The Atonement* (9,000)
 - Steinert-Threlkeld - *Twitter as Data* (8,700)
- Highest sales:
 - Craig - *The Atonement* (1798 units sold)
- Contains inline video clips (Youtube):
 - Zietsma - *Emotions in Organizations* (<https://doi.org/10.1017/9781108628051>)

In 2011, ethnographer Mark de Rond spent 6 weeks embedded with surgeons in the field hospital at Camp Bastion in Afghanistan, to study these high performing teams.

Video 1 Watch a video of a military medical team on a tour of duty in Afghanistan based on the research of Mark de Rond and Jako Lok's (2016) paper *Some Things Can Never Be Unseen*. Video Credit: Fred Lewsey, Cambridge University, www.youtube.com/watch?v=386JJ8Zj_CY.

In many ways, the people-centric perspective on emotions has highlighted the ways in which emotions can enable or disable agency within institutions, which is why this perspective often overlaps with the strategic. For example, Jakob-Sadeh and Zilber (*forthcoming*) describe how a Jewish Palestinian organization sought to control emotions in order to stabilize the internal

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.
