台灣政府於 2005 年頒定「政府資訊公開法」，在總則第一條明定「為建立政府資訊公開制度，便利人民共享及公平利用政府資訊，保障人民知的權利，增進人民對公共事務之瞭解、信賴及監督，並促進民主參與，特制定本法。」配合政府資訊公開，國家發展委員會要求政府資訊公開與電子化政府進行結合，目前政府行政機關的網頁上多設置「政府資訊公開專區」或類似版面，方便民眾取用相關資訊與資料，同時也設有管道讓民眾可利用申請方式取得資料（項靖、楊東謀，2012）。

The control of mechanical systems with nonholonomic constraints is important in numerous practical applications. In many industrial tasks such as rolling and cutting motions, the kinematic constraint equations are classical nonholonomic and the dynamics of such systems is very well understood [3-4]. Some motion tracking control schemes can be found in the literature for nonholonomic constraint mechanical systems [3,4,71] in which the complex dynamics of the entire mechanical system is assumed to be exactly known. Moreover, various robust and adaptive control schemes have already been carried out to address control design for perturbative nonholonomic mechanical systems [2,11,24, 25,30,54]. During the development of these classical robust/adaptive control algorithms, the use of a regressor matrix has become quite popular in the design of adaptive control algorithms, and the implementation of the developed control schemes always requires

Abstract
This research examines the effects of information sharing and information use on team decision making. While past studies are based on an implicit assumption that information sharing always leads to information use and optimal decision outcomes, the authors argue that this assumption is applicable only when information is equally distributed among decision makers in a team. By adopting the hidden profile paradigm, the authors suggest that when information is unequally distributed, information sharing does not facilitate optimal decision making. In the meantime, they find that team functional diversity is a main factor worsening the hidden profile situation that is, when decision makers are diverse in terms of their functional backgrounds, the facilitating effect of information sharing decreases. Results indicate that information use, rather than information sharing, is the ultimate gateway that leads decision makers to optimal decision outcomes. (C) 2015 Elsevier Inc. All rights reserved.

%X "云端"作為互聯網金融企業運用最為廣泛的高科技技術之一,在其模式創新、市場拓展過程中發揮了極為重要的作用,但也給傳統金融監管方式帶來了巨大挑戰。為此,本文從"云端"的概念和特點出發,分析"云端"互聯網金融在技術革新、對象虛擬化、金融形態變化等方面給金融監管帶來的挑戰,并以構建"云端"監管系統、突破"云端"監管桎梏、重建"云端"監管制度為框架提出構建我國"云端"互聯網金融監管體系,開展創新監管的政策建議。

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the 'Likely water' cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. ARTICLE INFO

ABSTRACT

Cytosine methylation is an epigenetically propagated DNA modification that can modify how the DNA molecule is recognized and expressed. DNA methylation undergoes extensive reprogramming during mammalian embryogenesis and is directly linked to the regulation of pluripotency and cellular identity. Studying its regulation is also important for a better understanding of the many diseases that show epigenetic deregulations, in particular, cancer. In the recent years, a lot of progress has been made to characterize the profiles of DNA methylation at the genome level, which revealed that patterns of DNA methylation are highly dynamic between cell types. Here, we discuss the importance of DNA methylation for genome regulation and the mechanisms that remodel the DNA methylome during mammalian development, in particular the involvement of the rediscovered modified base 5-hydroxymethylcytosine,

Obstacles to answering clinical questions can be grouped into physician-related obstacles and resource-related obstacles. Physician-related obstacles include the failure to recognize an information need, the decision to pursue questions only when answers are thought to exist, the preference for the most convenient resource rather than the most appropriate one, and the tendency to formulate questions that are difficult to answer with general resources(Anderson & Gestwicki, 2011).

The availability of coelacanth specimens enabled us to carry out genomic studies on these exceptional species(Chen, Wang, Ko, Yang, & Lou, 2012; Del Fabbro, Taschieri, Lodi, Banfi, & Weinstein Roberto, 2015). Coelacanths belong to the Sarcopterygii (lobe-finned fishes and tetrapods), in which lungfishes are also included. Indeed, molecular phylogenetic studies clearly indicate that coelacanths and lungfishes are more closely related to tetrapods than to teleost fishes, whereas the branching order of coelacanths, lungfishes, and tetrapods is still controversial. The karyotype of L. chalumnae, which was reported to be 48 chromosomes including microchromosomes, is similar to that of frogs and other species such as turtles or birds, further supporting the phylogenetic closeness of the coelacanth with tetrapods. Accordingly, the coelacanths may fill an evolutionary gap between fish and tetrapods. Considering that the lungfishes are not suitable for comparative genomic analysis because of their extremely large genomes), the coelacanth is a practical choice for genome-wide analysis.

"Birdbrain" should be a compliment(Binfield, 2008).

Pioneers in avian intelligence have found that although birds' brains are very small, they are incredibly intelligent, and sometimes have surprising similarities to the behavior or brain functions of humans. Examples range from the cockatoo who was the first animal documented to dance to a beat to Irene Pepperberg's in-depth studies done with the African grey parrot Alex (named for Avian Learning EXperiment).(Laudato, 2010; Pepperberg, 1999) There have even been studies documenting that some birds successfully use, and even modify or build, tools.(Bird & Emery, 2009; Holzhaider et al., 2011; von Bayern, Heathcote, Rutz, & Kacelnik, 2009)

若我的文章中，同時會引用中文和英文的書目格式，該如何將兩份文件合併呢？

如何讓中英文參考文獻格式並存

如何讓中英文參考文獻格式並存

- **運用Unused的Reference Types**
- **運用2份Word檔**
- **EndNote + Mendeley**

【三種方法比一比？】(以下引自臺大圖書館參考服務部落格)

- 「運用2份Word檔」是**最簡單、最容易理解**的；但您需同時維護兩份Word文件。
- 若您對EndNote和Mendeley都不陌生，則本文介紹的「EndNote + Mendeley」，應該會比「運用2份Word檔」**需要手動修改的程度更低**。
- 「運用Unused的Reference Types」事前準備最多，個人認為較不易上手。
- 究竟該選用哪一種好呢？**建議您先用一個簡單的範例試試，看哪種方法最順手。**

APA 第六版中文格式下載

來源1：下載**APA 第六版中文格式**（感謝：知名部落客 XXC 分享）
來源2：教材包有"APA 6th 中文版_一般適用(林天佑版).ens" 格式檔
存於： 我的電腦 > 本機磁碟**(C:) > Program Files(x86) > EndNote X8> Styles**

範例：運用**2**份**Word**檔

1.先在文章內插入英文的Citations(並使用英文的格式，如APA 6th)

2.插入全部的英文格式後，移除此份文件的參數。

移除參數:
1.從 Bibliography的Covert Citations and Bibliography下的 **Covert to Plain Text**。

2.請另存一份移除參數的Word檔，保留有參數的檔案，以方便日後再運用。

範例：運用2份Word檔

3.請在這份沒有參數的文件中，繼續插入中文的Citations(請改成中文的APA格式，如APA_6_TW_021)
4.在這份文件中，可以發現中文的參考書目會列在英文的參考書目下方
5.等插入全部的中文書目之後，再一次移除參數
6.如此後方的參考書目會中文、英文書目分開排列呈現

Mumps, measles and rubella (MMR) are serious diseases that can lead to

potentially fatal illness, (黃淑芬，2002) disability and death. However, public debate

over the safety of the trivalent MMR vaccine and the resultant drop in vaccination
coverage in several countries persists, despite its almost universal use and accepted
effectiveness. OBJECTIVES: To assess the effectiveness and adverse effects
associated with the MMR vaccine in children up to 15 years of age. SEARCH
METHODS: For this update we searched the Cochrane Central Register of Controlled
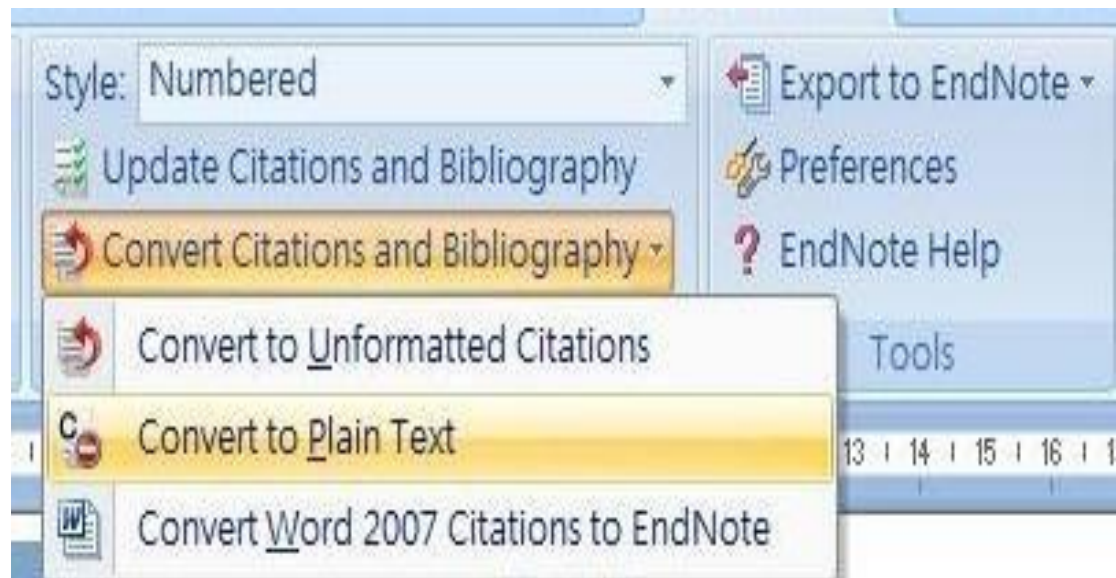

Trials (CENTRAL) (The Cochrane Library 2011, Issue 2), (林慧芳，2002) ↵
