如果作者沒有可用的協議為其承擔出版費用，他們可以選擇以訂閱形式發表文章，或使用其他經費支付開放獲取費用。

若作者選擇開放獲取，他們將會收到費用明細。

## Publish open access

Journal of Research offers you the opportunity to publish your article open access. Publishing open access offers a number of benefits:

- Increased researcher engagement
- Higher visibility and greater impact
- Easy compliance with mandates
- The copyright remains with you

You can learn more about the benefits of publishing open access [here](#).

Many funders and institutions mandate and finance open access publishing. To find out if you have access to funds that will allow open access publication at no cost to you, please take a look at our OA funding database [here](#) or contact your librarian.

If your research is supported by a funder that requires immediate open access (e.g. according to [Plan S principles](#)) then you should select the open access publishing route. For authors selecting the subscription publishing route, the journal's standard licensing terms will need to be accepted, including [self-archiving policies](#). Those licensing terms will supersede any other terms that the author or any third party may assert apply to any version of the manuscript.

Should you choose to publish open access below, an article-processing charge (APC) will apply, with the currency charged dependent on the billing country of the invoiced party and subject to local taxes where applicable. [Learn more about APCs](#).

Please select your publishing model:

- Publish open access (APC £3780.10 / \$4080.50 / €4120.90 + tax)
- Publish subscription
